OF THE GREAT SOUTHWESTERN COUNTRY IS GAUGED.

By the Enormous Sales of Singer Sewing Machines—While Other Machines Are Abundant There Is a Scarcity of Singers.

J. N. Morgan, manager for the Singer Sewing Machine company in the Oklahoma nation in conversation with a company of friends yesterday said, "It's somewhat surprising to me to learn that the Singer Manufacturing company cannot supply the demand for Singer Sewing machine. My house is almost empty, my orders have been delayed and I tried to get machines from the Oklahoma Agency. They replied that they did not have a sufficient number to meet their demands. Then I asked the Texas house and met with the same reply. I received notice today that a car has been shipped to me and I am anxiously awaiting its arrival."

The reason may be drawn from the scarcity of Singer sewing machines in the southwest. First, the people, as a rule, are prosperous and are sewing purchases; second, when they purchase sewing machines they get the Singer. While other makes of machines are in abundance there is a scarcity of Singers. The first sewing machine ever placed on the market was the Singer. It has kept fully up with the times and today it is recognized as the World's standard as a good machine.

Mr. Morgan, car of new machines will be here within a few days and if you are in need of the machine of one size or another and have one of the shipment reserved for you.

While waiting for the arrival of the new machines Mr. Morgan is making some big business in second-hand machines.
